Review of Prefinal Remedial Design (RD) Package

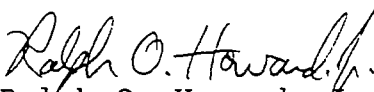

Dear Mr. Haynes:

On May 28, 1993, EPA received six copies of the Prefinal Remedial Design Package from the Medley Farm Steering Committee's RD contractor, RMT Inc. As has been the deliverables protocol throughout the project, RMT has provided the required number of copies directly to your office for the State's review and comment.

As you are aware, a variety of additional data collection tasks have been completed since the Preliminary Design was reviewed. These are presented in section 2 of the attached document. Of particular importance is the revised understanding of Site geology, in sections 2.2 and 3.1, which would affect groundwater remediation.

Please coordinate the State's review and comment on these documents as necessary. I ask that you have your comments to me no later than Thursday, June 24, 1993. If there are questions, please call me at (404) 347-7791.

Sincerely,

Ralph O. Howard, Jr.
Remedial Project Manager
